Platone Newsletter #1.

Dear readers,

welcome to the first edition of our Platone Newsletter. With this newsletter we want to provide you with a selection of latest updates from our Platone project and our joint activities to unlock grid flexibility and realise an open and non-discriminatory market.

The Platone Newsletter will be brought to you four times a year. If you have any questions or if there is anything else you always wanted to tell us please do not hesitate to contact us!

Best wishes from the Platone consortium!

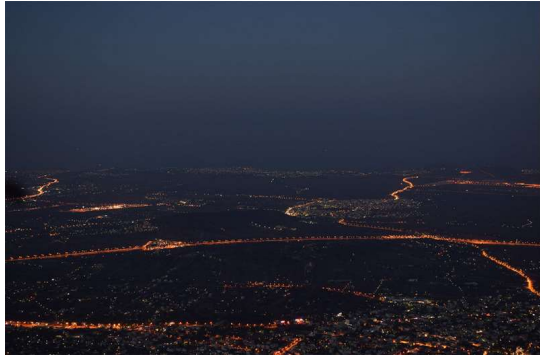

The project PLATform for Operation of distribution NETworks (Platone) receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 86430.

The sole responsibility of this publication lies with the contributor, the [B.A.U.M. Consult GmbH](#). The European Union is not responsible for any use that may be made of the information contained therein.

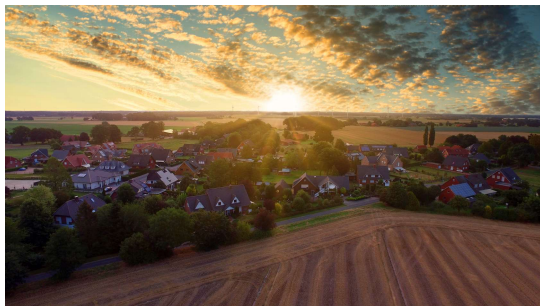

Unlocking the flexibility market in Italy

To enable the customer into market, an innovative and cheap device, named Light Node, was installed by **areti** at the Italian demonstration. It is totally free to the customer. If you want to learn how the Light Node works and

How network tariffs can incentivise flexibility

At the Greek demo the **National Technical University of Athens** developed a novel model to design variable and smart distribution use-of-system tariffs. Greek partner **HEDNO** was also able to gain valuable experience recently. Learn more about both issues [here](#).

German training centre implements prosumer prototype

German demo-leader **Avacon** is expecting first results from their prosumer prototypes soon. But how do the results retrieve from? Find out more [here](#).

SAVE THE DATE: On **28 April from 13-1700h CET** the first official FlexGroups meeting of the **FlexCommunity** take place.

The Platone project initiated the **FlexCommunity** that unites efforts to enable the large-scale use of flexibilities in the energy system. Please be invited to join! [Learn more](#).
